John W. Fitzpatrick is the Director of the Cornell Lab of Ornithology, Ithaca. His current research focuses on the ecology, conservation biology, and population genetics of the endangered Florida scrub-jay.

THIS IS A MULTI-MEDIA LECTURE ON THE KEY ROLE OF BIRDS AND CITIZEN SCIENCE IN UNDERSTANDING HOW WE CAN PRIORITISE, PRESERVE, AND MANAGE EARTH'S NATURAL SYSTEMS. I WILL TALK ABOUT THE ENORMOUS AND GROWING POWER OF BIRD AND RELATED BIG-DATA ANALYTICS IN UNDERSTANDING GLOBAL PATTERNS OF MOVEMENT AND POPULATION CHANGE
